# TREASURY MANAGEMENT

VIP Access

Secure Tokens

To provide an additional layer of security for our clients that utilize our ACH, Wire, or Online Bill Pay modules, The National Bank of Indianapolis is requiring the use of a Secure Token/Credential. This token is a third-party application from Symantec that you can search for and download to your smartphone from the App Store (iOS) or Play Store (Android). During each login, users will be prompted to enter a different six-digit code that is generated by the token. Because the token code changes every 30 seconds, if the user enters the wrong credential code, or does not have their token, they will not be able to log in to their Corporate Portrait Corporate Snapshot or Treasury Platform.

Token Options

Two types of tokens are available for users to choose from:
1.) Mobile App Token – Free Download; search "VIP Access" by Symantec through the Apple Store (iOS) or Play Store (Android).
2.) Physical Tokens – provided to your organization at cost.

NOTE: If you have to do a factory reset on your mobile device or obtain a new mobile device, please call TM Support at 317-261-0333 for assistance to register your new mobile device.

Questions? Please contact our Treasury Management Support Team at 317-261-0333 or treasurymanagement@nbofi.com.
